

HELPING HANDS

Coping with Stress During Infectious Disease Outbreaks

(from SAMSHSA.gov)

What You Should Know

When you hear, read, or watch news about an outbreak of an infectious disease such as Ebola, you may feel anxious and show signs of stress—even when the outbreak affects people far from where you live and you are at low or no risk of getting sick. These signs of stress are normal and may be more likely or pronounced in people with loved ones in parts of the world affected by the outbreak. In the wake of an infectious disease outbreak, monitor your own physical and mental health. Know the signs of stress in yourself and your loved ones. Know how to relieve stress and know when to get help.

Know the Signs of Stress

What follows are behavioral, physical, emotional, and cognitive responses that are all common signs of anxiety and stress. You may notice some of them after you learn about an infectious disease outbreak.

YOUR BEHAVIOR:

- An increase or decrease in your energy and activity levels
- An increase in your alcohol, tobacco use, or use of illegal drugs
- An increase in irritability, with outbursts of anger and frequent arguing
- Having trouble relaxing or sleeping
- Crying frequently
- Worrying excessively
- Wanting to be alone most of the time
- Blaming other people for everything
- Having difficulty communicating or listening
- Having difficulty giving or accepting help
- Inability to feel pleasure or have fun

Know How to Relieve Stress

You can manage and alleviate your stress by taking time to take care of yourself.

KEEP THINGS IN PERSPECTIVE:

Set limits on how much time you spend reading or watching news about the outbreak. You will want to stay up to date on news of the outbreak, particularly if you have loved ones in places where many people have gotten sick. But make sure to take time away from the news to focus on things in your life that are going well and that you can control.

GET THE FACTS:

Find people and resources you can depend on for accurate health information. Learn from them about the outbreak and how you can protect yourself against illness, if you are at risk. You may turn to your family doctor, a state or local health department, U.S. government agencies, or an international organization. Find reliable links to good sources of information about infectious disease outbreaks. Refer to the box on page 2.

Your IAM EAP Representative listed on page 2 can help – the call is free and confidential

Take Good Care of Yourself to Be Able to Take Care of Others

KEEP YOURSELF HEALTHY:

- Eat healthy foods, and drink water.
- Avoid excessive amounts of caffeine and alcohol.
- Do not use tobacco or illegal drugs.
- Get enough sleep and rest.
- Get physical exercise.

USE PRACTICAL WAYS TO RELAX:

- Relax your body often by doing things that work for you—take deep breaths, stretch, meditate, wash your face and hands, or engage in pleasurable hobbies.
- Pace yourself between stressful activities and do a fun thing after a hard task.
- Use time off to relax—eat a good meal, read, listen to music, take a bath, or talk to family.
- Talk about your feelings to loved ones and friends often.

The heart and soul of the District 141 Employee Assistance Program is the local lodge EAP peer coordinator. These dedicated men and women volunteer their personal time to assist other union members and their families who are experiencing personal difficulties. EAP peer coordinators do not make clinical diagnoses or clinical evaluations, however, they are trained to make a basic assessment of your situation and refer you to an appropriate resource for a more detailed evaluation. EAP peer coordinators will follow up to ensure you have been able to access services that addressed the difficulty you were experiencing.
